

STIKK

Being the collective voice of the Information and Communication Technology (ICT) in Kosovo, STIKK promotes the converging interests of the businesses and individuals in the field of information and communication technology. STIKK is dedicated to consult and support the long-term growth of the ICT industry and is committed to promoting the contribution of ICT to economic growth and progress in Kosovo. Currently, STIKK represents around 80% of tech companies in Kosovo, which enables our organization to **offer an enormous variety of technologies**, mostly focused on software development, mobile app & solutions, web development, UX/UI design, IT specifications, software & mobile testing, ERP products, system architecture, databases, maintenance & support, and many more.
